Tapomoy Adhikari

STUDENT | RESEARCHER | PASSIONATE DEVELOPER | COMPUTER SCIENCE

https://tapomoyadhikari.github.io/ | https://google.com/tapomoy
tapo3930@gmail.com | +91 96098 00138 | tapomoy.adhikari@griffins.edu.in

EDUCATION

i. **GRIFFINS INTERNATIONAL SCHOOL, KHARAGPUR**
Schoolings

Student of Grade IX (Dec., 2022)
September, 2020 — Present

PROFILES

i. Google://tapomoyadhikari
ii. Microsoft://tapomoyadhikari
iii. LinkedIn://tapomoyadhikari
iv. Github://tapomoyadhikari
v. Twitter://tapomoyadhikari
vi. StackOverflow://tapomoyadhikari

SKILLS

1. **Programming**

   C, C++, C#, Go, Python, Perl, Swift, Kotlin, PHP, Frontend (HTML, CSS, SCSS, Angular, React, React Native, others), Django, Conda

2. **Data Structure and Algorithm**
3. **Communication**
4. **Learning**
5. **Editor**
6. **Author**
   and others.

EXPERIENCE

1. **Tata Consultancy Services**
   Junior Researcher
   Computer Science and Engg.

   Oct., 2022 — Jan, 2023
2. **Corgnit**
   Host
   Computer Science (AI & ML)

   Mar., 2014 — Present
3. **Google**
   Artificial Intelligence and Machine Learning

   Researcher
   Jul., 2018 – Dec., 2022

   Junior Research Fellowship
   Jan., 2023 — Present
4. **Cognizant Technology Solutions (CTS), India, Private Limited**
   Junior Researcher
   Machine Learning

   Jan., 2023 — Present
5. **Huawei Technologies**
   Principal Researcher
   Artificial Intelligence and Big Data

   Jan., 2023 — Present
6. **Microsoft Corporation Pvt. Ltd.**
   Artificial Intelligence and Machine Learning
   Published many research papers under *Microsoft Corporation.*

   Junior Researcher
   Oct., 2022 — Present

   Principal Researcher
   Jan., 2023 — Present

RESEARCH

1. Secured File Protocol for QoS Aware Systems and for organizational security
2. QoS Aware Detector System using Augmented and Virtual Reality
3. Real-time Chat Application
4. Smart City using IoT for advanced agriculture
5. Agricultural IoT : Enhanced farming in India
6. Git Cloner
7. Real-time Video Conferencing Environment
8. Integrated C, C++, Perl & Swift Environment in OS X
9. Sustainable Development Goal - Integrated using commercial IoT : Based on Linux Environment specializing in Fedora and RHEL 2.9 Linux
10. Advanced Internet of Things: Campus Security System for Enhanced Security
11. Kotlin, Java, Go, Objective C, Perl, Swift: Notes and To Do(s) Android & iOS Application, and Windows Software
12. Swift: iOS based IDE for advanced programming, named as AdvPro for iPhones
13. Neural Machine Translation
14. Generative Adversital Networks for Image Generation
15. Python: Real-time face recognition using Deep Learning
16. Exploration of the potential of reinforcement learning in Artificial Intelligence
17. Implementation of a Secure Block chain-based network
18. Industrial IoT: Deep Learning for Predictive Maintenance in Industrial IoT
19. Developing Autonomous Systems using Python based Artificial Intelligence
20. Investigating the Use of Edge Computing for Improving IoT Applications
21. Exploring the Use of Natural Language Processing for Sentiment Analysis in Social Media
22. Investigating the Potential of Generative Adversarial Networks (GANs) for Computer-Generated Art and Design
23. Development of a Smart Agriculture System using Drones and Computer Vision
24. Evaluating the Effectiveness of Transfer Learning in Natural Language Processing
25. Exploring the Potential of Augmented Reality for Enhancing Online Learning Experience
26. Industrial IoT: Deep Learning for Predictive Maintenance in Industrial IoT
27. Blockchain-based Secure File Sharing System
28. Autonomous Vehicle Navigation using Machine Learning
29. A System using Quantum Computing for Secure Tele-Communications
30. Cloud-based Protected Document Collaboration System
31. Implementation of Industrial IoT for the development in the Campus Security
32. Setup of a Automated Emailer with voice instruction for Smart Offices
33. Smart Home: A Sustainable Development Goal

tapo3930@gmail.com
Bengaluru, Karnataka, India

PUBLICATIONS

1. Development of Autonomous Systems using Python based Artificial Intelligence
2. Investigating the Use of Edge Computing for Improving IoT Applications
3. Exploring the Use of Natural Language Processing for Sentiment Analysis in social media
4. Investigating the Potential of Generative Adversarial Networks (GANs) for Computer-Generated Art and Design
5. Exploring the Potential of Augmented Reality for Enhancing Online Learning Experience
6. Scalable Quantum Computer Architecture using Superconducting Qubits.
7. Development of a Cloud-based Infrastructure for Big Data Analytics
   [Published under Google and Microsoft at IEEE Xplore]
8. A Comparative Study of IP Address Representation Formats: Performance and Scalability Analysis
   [Published under Microsoft at IEEE Xplore]
9. A Study of Computational Learning Theory and its Applications to Machine Learning
   [Re-published by Microsoft Corp.]
10. Design and Implementation of Cloud-based Secured File Sharing System [Published by Dept. of Science and Technology (DST), Government of India]
11. Investigating the Impact of Hyperparameter Optimization on Image Recognition with Deep Learning [Published by Google & Microsoft; Co-authored by Microsoft India & Google]
